DETAILED ACTION

This Office Action is in response to amendments filed February 7, 2005. Examiner would like to take this opportunity to raise the issue of a Restriction Requirement.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121.
 - I. Claims 1-6, drawn to a method for remotely monitoring and diagnosing operations of a machine, classified in class 714, subclass 25.
 - II. Claims 7-11, drawn to a local tool for providing analysis of a machine's operating condition comprising a plurality of sensors connected to the machine, a processor for receiving information from the sensors and for analyzing the information class 709, subclass 224.
 - III. Claims 12-19, drawn to a diagnostic tool located remotely from a machine providing diagnosis on an anomaly including two distinctive types of pattern matching libraries, classified in class 714, subclass 47.
2. The inventions are distinct, each from one another because of the following reasons:

Inventions II, III, and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. See MPEP § 806.05(d).

3. A telephone call was made to Applicant's representative to request an oral election to the above restriction requirement, but did not result in an election being made.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
